Module 1

Exercise: Introding Java EE 6 Platforms

Exercise objective

In these practices, you categorize Java EE services, describe the Java EE platform layers.

Tasks

1. Place each Java EE service in the appropriate service category in the following table:

- Persistence, Scalability, Naming, Threading
- Remote object communication, Connector, Load Balancing, Failover
- Security, Life-cycle services, Transaction, Messaging

No	Service Category	Java EE Services
1	Deployment-based Services	
2	API-based services	
3	Inherent Services	
4	Vendor-specific Services	

2. Match the number of each description with the corresponding layer in Figure:

a. Databases and other back-end services
b. API layer
c. Service layer
d. Component layer
