Module 5

Exercise: *JBoss Web Server Configuration*

Exercise objective

Installing APR Native Connector

Preparation

Download the following items from the course web page

- JBoss Native Connector for Windows 32-bit/64-bit: **`jboss-native-2.0.10-windows-x86-ssl.zip`**

Tasks

1. Unzip the **JBoss Native `jboss-native-2.0.10-windows-x86-ssl.zip`** into the home folder of your **JBoss AS** distribution.
2. Add the following line to standalone.conf.bat

   set "JAVA_OPTS=%JAVA_OPTS% -Djava.library.path=%JBOSS_HOME%/bin/native"

3. Now, restart **JBoss AS**, which will now detect the presence of the native libraries and leverage them
4. Change the default http public port 8080 to 4040.
5. Make sure that URL http://localhost:4040/movie/search is still responding.
